SUBJECT: STUDENT PHYSICALS

Health Examination

Each student enrolled in District schools must have a satisfactory health examination conducted by the student's physician, physician assistant or nurse practitioner within twelve (12) months prior to the commencement of the school year of:

a) The student's entrance in a District school at any grade level;

b) Entrance to pre-kindergarten or kindergarten;

c) Entry into the 2nd, 4th, 7th and 10th grades.

The District may also require an examination and health history of a student when it is determined by the District that it would promote the educational interests of the student.

In addition, the District requires a certificate of physical fitness for:

a) All athletes prior to their first sport of the school year, then only those who were injured or ill during their first sport before participating in a second sport during the school year; and

b) All students who need work permits.

Health Certificate

Each student must submit a health certificate attesting to the health examination within thirty (30) days after his/her entrance into school and within thirty (30) days after his/her entry into the 2nd, 4th, 7th and 10th grades. The health certificate shall be filed in the student's cumulative record. The health certificate must:

a) Describe the condition of the student when the examination was given;

b) State the results of any test conducted on the student for sickle cell anemia;

c) State whether the student is in a fit condition of health to permit his/her attendance at public school and, where applicable, whether the student has defective sight or hearing, or any other physical disability which may tend to prevent the student from receiving the full benefit of school work or from receiving the best educational results, or which may require a modification of such work to prevent injury to the student;

SUBJECT: STUDENT PHYSICALS (Cont'd.)

d) Include a calculation of the student’s body mass index (BMI) and weight status category. BMI is computed as the weight in kilograms divided by the square of height in meters or the weight in pounds divided by the square of height in inches multiplied by a conversion factor of 703. Weight status categories for children and adolescents shall be defined by the Commissioner of Health. BMI collection is mandatory, effective September 2008. Reporting is random, with districts chosen by the NYS Department of Health. Selected districts must report BMI results on-line using DOH’s Health Provider Network (HPN), a secure website;

e) Be signed by a duly licensed physician, physician assistant, or nurse practitioner, who is authorized by law to practice in New York State consistent with any applicable written practice agreement; or authorized to practice in the jurisdiction in which the examination was given, provided that the Commissioner of Health has determined that such jurisdiction has standards of licensure and practice comparable to those of New York. A certificate signed by a chiropractor is not acceptable except for a scoliosis evaluation.

Dental Certificate

The dental certificate law became effective on September 1, 2008. This law applies to new entrants in PreK, K, Grades 2, 4, 7 and 10. In accordance with this law, a notice of request for a dental health certificate shall be distributed at the same time that the parent/person in parental relation is notified of health examination requirements, such certificate to be furnished at the same time the health certificate is required. At this time, students will be permitted to attend school regardless of whether or not they have a dental certificate.

The dental certificate shall be signed by a duly licensed dentist authorized by law to practice in New York State or one who is authorized to practice in the jurisdiction in which the examination was performed, provided that the Commissioner has determined that the jurisdiction has standards of licensure and practice comparable to New York State. The certificate shall describe the dental health condition of the student upon examination, which shall not be more than twelve (12) months prior to the commencement of the school year in which the examination is requested, and shall state whether the student is in fit condition of dental health to permit his/her attendance at the public schools.

Requests are not to be retroactive (i.e., any physical requested prior to September 1, 2008 does not need to have an additional notice sent requesting the dental certificate). Requests are not required when the student or parent/person in parental relation objects on the grounds of conflict with their genuine and sincere religious beliefs. Within thirty (30) days following the student’s entrance in the school or grade, the certificate, if obtained, shall be filed in the student’s cumulative health record.

Examination by Health Appraisal

The Principal or the Principal's designee will send a notice to the parents of, or person in parental relation to, any student who does not present a health certificate, that if the required health certificate is not furnished within thirty (30) days from the date of such notice, an examination by health appraisal will be made of such student by the Director of School Health Services.

The Director of School Health Services shall cause such students to be separately and carefully examined and tested to ascertain whether any such student has defective sight or hearing, or any other physical disability which may tend to prevent the student from receiving the full benefit of school work or from receiving the best educational results, or which may require a modification of such work to prevent injury to the student.

The physician, physician assistant or nurse practitioner administering such examination shall determine whether a one-time test for sickle cell anemia is necessary or desirable and, if so determined, shall conduct such test and include the results in the health certificate.

Unless otherwise prohibited by law, if it is ascertained that any students have defective sight or hearing, or a physical disability or other condition, including sickle cell anemia which may require professional attention with regard to health, the Principal or Principal's designee shall notify, in writing, the student's parents or persons in parental relation as to the existence of such disability. If the parents or persons in parental relation are unable or unwilling to provide the necessary relief and treatment for such students, such fact shall be reported by the Principal or Principal's designee to the Director of School Health Services, who then has the duty to provide relief for such students.

Health Screenings

The District will provide:

a) Scoliosis screening at least once each school year for all students in grades 5 through 9. The positive results of any such screening examinations for the presence of scoliosis shall be provided in writing to the student's parent or person in parental relation within ninety (90) days after such finding;

b) Vision screening to all students who enroll in school including at a minimum color perception, distance acuity, and near vision within six (6) months of admission to the school. In addition, all students shall be screened for distance acuity in grades Kindergarten, 1, 2, 3, 5, 7 and 10 and at any other time deemed necessary. The results of all such vision screening examinations shall be in provided in writing to the student's parent or person in parental relation and to any teacher of the student. The vision report will be kept in a permanent file of the school for at least as long as the minimum retention period for such records;

(Continued)
SUBJECT: STUDENT PHYSICALS (Cont’d.)

c) Hearing screening to all students within six (6) months of admission to the school and in grades Kindergarten, 1, 3, 5, 7 and 10, as well as at any other time deemed necessary. Screening shall include, but not be limited to, pure tone and threshold air conduction screening. The results of any such hearing tests shall be provided in writing to the student's parent or person in parental relation and to any teacher of the student.

The results of all health screenings (dental, hearing, vision and scoliosis) shall be recorded on appropriate forms signed by the health professional making the examination, include appropriate recommendations, and be kept on file in the school. The health records of individual students will be kept confidential in accordance with the federal Family Educational Rights and Privacy Act (FERPA) and any other applicable federal and State laws.

Accommodation for Religious Beliefs

No health examinations, health history, examinations for health appraisal, screening examinations for sickle cell anemia and/or other health screenings shall be required where a student or the parent or person in parental relation to such student objects thereto on the grounds that such examinations, health history and/or screenings conflict with their genuine and sincere religious beliefs. A written and signed statement from the student or the student's parent or person in parental relation that such person holds such beliefs shall be submitted to the Principal or Principal's designee, in which case the Principal or Principal's designee may require supporting documents.

Homeless Students

For homeless children, the enrolling school must immediately refer the parent or guardian of the student to the District's homeless liaison, who must assist them in obtaining the necessary medical records.
